<https://jmh-datasciences.com>

Seasoned data scientist that uses analytics, machine learning (ML), and artificial intelligence (AI) to solve challenging business problems across many verticals:

- ***manufacturing***
- ***oil & gas***
- ***insurance***
- ***real estate***
- ***retail***
- ***etc***

Solutions are developed using python's data-science stack *jupyter, pandas, scikit-learn, tensorflow*, using big data tools such as *spark & cloud* as needed.

High-skill, experienced problem solver with physics PhD and many years experience as a data scientist, and advisor to those seeking to grow their skills.

Services Provided:

- using data+algorithms to understand your business, tell your data story, and formulate actionable next steps
- data visualization & trend analysis
- develop ML models and/or simple neural networks to:
 - *optimize your business*
 - *forecast the future*
 - *grow revenue*
 - *minimize waste*
- ML-ops: ML model development, deployment, and maintenance
- provide sage advise about best next steps, recommended tools, and their required skills
- advise/train your team about their use cases, to deliver on the above and to expand their impact
- help you select & deploy impactful AI and GenAI solutions
- in the cloud, on-prem, or hybrid
